PROJECT: FLEXAGENDA

Android app for time planning (freemium). Reached 100k installs organically; 4.3/5 average rating. I developed the app from scratch in native Android & Java and released many versions based on a lot of user feedback I received. I was also in regular communication with users (paid and gratis) over e-mail, IM and voice chat, helping to solve issues and discussing improvement suggestions. App available in English, Spanish, German, Polish.

PROJECT: MEZZANINE ANDROID

Lead developer on the Android client of Company's flagship product, Mezzanine. I solidified and refactored existing codebase/prototype written by a Junior Developer, successfully releasing it and then making subsequent releases with new features. Also developed a schema language and code generator for Company's communication protocol, using JetBrains MPS (generating Java code from a DSL).

PROJECT: TEAMFORGE INTEGRATION WITH GERRIT AND GIT

Worked at the Company that created Subversion (Svn) version control system, somewhat ironically on development of integration of Git and Gerrit with CollabNet's flagship product - TeamForge, an ALM (Application Lifecycle Management) enterprise system, used by big enterprise clients like Intel, Ericsson, NXP. We were also dogfooding using the Gerrit-based code review system which was a great opportunity to also master advanced Git workflows using rebasing, squashing, etc.
