

~15 Years of international...

 ...cross-platform experience:

Languages

- ## Experience

[Please also take a look at skills endorsements on LinkedIn](#)

▲ BEGINNER ▲ INTERMEDIATE ▲ ADVANCED ▲ EXPERT

EXAMPLE:

f_3 Angular - have: advanced; on my way to become: expert.

MAIN EXPERIENCE (EXTENSIVE USAGE AND ALWAYS HONING MY SKILLS AND LEARNING)

ADDITIONAL EXPERIENCE (LEARNING MORE, BUT NOT AS CRITICAL FOR ME NOW)

The diagram illustrates the relationships between various technologies in a DevOps ecosystem, organized into five rows:

- FRONTEND:** React, Gatsby, Ember
- BACKEND:** Spring, Spring Boot, Docker, Kubernetes
- TESTING:** JUnit, TestNG
- TOOLS:** RubyMine, Jenkins
- LANGUAGES:** Java, Swift, Python

Arrows indicate dependencies or relationships between these technologies. For example, React, Gatsby, and Ember are associated with Spring and Spring Boot. Spring and Spring Boot are associated with Docker and Kubernetes. Docker and Kubernetes are associated with Jenkins. Jenkins is associated with RubyMine. RubyMine is associated with JUnit and TestNG. JUnit and TestNG are associated with Java, Swift, and Python. Java, Swift, and Python are associated with Jenkins.

EXPANDING TO (ACTIVELY LEARNING AND READY TO TAKE PROJECTS)

A grid of 15 technology logos categorized into Frontend, Backend, Frontend and Backend App Platforms, Testing, Languages, Databases, Mobile, and AI. The logos are arranged in a grid with 8 rows and 2 columns. The categories are listed on the left, and the logos are on the right. The logos are: Frontend: Vue.js, Angular Elements, Material, Vue.js, SVG.js, Storybook, nuxt.js, Domain-Driven Design. Backend: NextJS, Deno. Frontend and Backend App Platforms: Akita. Testing: Cypress. Languages: Dart. Databases: SurrealDB. Mobile: Capacitor, NativeScript, Flutter. AI: TensorFlow.

EARLIER EXPERIENCE (ALWAYS CURIOUS TO LEARN MORE, BUT NO PARTICULAR NEED RIGHT NOW)
