EXAMPLE:

▲ Angular ▲ - have; advanced; on my way to become: expert.

This image is a comprehensive grid of technology logos, categorized into 15 main groups. Each logo is accompanied by a small external link icon (a square with a diagonal line). The categories and their respective logos are as follows:

- FRONTEND**
 - HTML5, CSS3, PWA, D3.js, Chart.js, PrimeNG, Next.js, xplat, WebPack, Angular, CodeLyzer, Ionic, Lodash, Bootstrap, jQuery, GraphQL, Angular Grid, AngularFire
 - NgRx, NGXS, React, WebSocket, Chrome Extensions, Fort Awesome, Lighthouse, three.js, WebGL, gTTF, Micro Frontends
- BACKEND**
 - Microservices, Node.js, GraphQL, Express.js, KeystoneJS, NGINX
- TESTING**
 - TestCafe, Jest, Karma, Jasmine
- TOOLS**
 - WebStorm, Android Studio, IntelliJ IDEA, Visual Studio, Visual Studio Code, Vm, VirtualBox
- LANGUAGES**
 - TypeScript, Kotlin, Markdown, Bash
- DATABASES**
 - MongoDB, Mongoose, NoSQL, PostgreSQL, MySQL, ORACLE Oracle, IndexedDB
- VERSION CONTROL**
 - Git, GitHub, GitLab
- GRAPHICS**
 - SVG, Figma, Blender, Adobe Illustrator, Adobe Photoshop, Adobe Creative Cloud, Affinity Designer, GIMP, Inkcape
- OS**
 - Linux, Ubuntu Linux, SUSE Linux, Red-Hat Linux, CentOS CentOS Linux, Debian Linux, Fedora Linux, macOS, Windows/Microsoft Windows
- MOBILE**
 - Android
- CLOUD**
 - Firebase, Cloud Firestore, GCP - Google Cloud Platform
- JAVASCRIPT**
 - Promises, RxJS
- BUILD SYSTEMS AND PACKAGE MANAGERS**
 - Gradle, Yarn, npm/NPM
- OTHER**
 - Google Play, WordPress, ReactiveX, RegExp, Google Maps, Customer Support, Agile, Scrum, ALM - Application Lifecycle Management, Algorithms, Data Structures, OOP - Object Oriented Programming
 - SOLID Principles, FP - Functional Programming, Design Patterns, Software Architecture, Refactoring, Code Review, TDD - Test-Driven Development, BDD - Behavior-Driven Development, DSL - Domain-Specific Languages, Antipatterns
 - Making Presentations, Leadership, Performance Optimization, Performance Profiling, UX - User Experience, Troubleshooting, Graphic Design, Testing

The diagram illustrates the relationships between various technologies, categorized into five groups: Frontend, Backend, Testing, Tools, and Languages. Arrows indicate dependencies or relationships between these technologies.

Genengine SL (as Consultant)

2019 - 2020

Málaga, on-site and remote

[Please also take a look at 2 recommendations on LinkedIn](#)

[PROJECT: GENENGINE ANGULAR APP FOR GENETIC DIAGNOSIS OF RARE DISEASES](#)

First I wrote a suite of E2E UI tests in TestCafe from scratch, in order to increase confidence while making changes. Then I made numerous improvements of UI/UX, performance, robustness, architecture, refactors and I prepared the app for release. Working directly with CEO & CTO. Communication in English and Spanish.

[Please also take a look at 2 recommendations on LinkedIn](#)

[PROJECT: PLATFORM FOR ASSESSING RISK](#)

PWA working fully offline and synchronising with server to support multi-million-dollar multi-national functionality. Advanced analytics using charts and grid. Internationalisation. I developed the Angular + Bootstrap app from scratch and helped with the Node.js + MongoDB backend (conceptually as well as in development). Communication in English and German.

PROJECT: FLEXAGENDA

Android app for time planning (freemium). Reached 100k installs organically. 4.3/5 average rating. I developed the app from scratch in native Android & Java and released many versions based on a lot of user feedback I received. I was also in regular communication with users (paid and gratis) over e-mail, IM and voice chat, helping to solve issues and discussing improvement suggestions. App available in English, Spanish, German, Polish.

PROJECT: LIFESUITE

ionic 5 App (Web, Android, iOS) for finding solutions (psychology, motivation, productivity, etc.) to common life problems and to see life overview in terms of charts (SVG) like Ikigai, Flow State, etc. Released to Google Play and soon to Apple App Store. Has a search engine with Damerau-Levenshtein distance between strings - fuzzy search taking typos into account, with memoization for performance optimization. Strictest settings of TypeScript and Angular.

PROJECT: MEZZANINE ANDROID

Lead developer on the Android client of Company's flagship product, Mezzanine. I solidified and refactored existing codebase/prototype written by a Junior Developer, successfully releasing it and then making subsequent releases with new features. Also developed a schema language and code generator for Company's communication protocol, using JetBrains MPS (generating Java code from a DSL).

PROJECT: TEAMFORGE INTEGRATION WITH GERRIT AND GIT

Worked at the Company that created Subversion (Svn) version control system, somewhat ironically on development of integration of Git and Gerrit with CollabNet's flagship product - TeamForge, an ALM (Application Lifecycle Management) enterprise system, used by big enterprise clients like Intel, Ericsson, NXP. We were also dogfooding using the Gerrit-based code review system which was a great opportunity to also master advanced Git workflows using rebasing, squashing, etc.
