LEGEND:
 ♣ BEGINNER ♠ INTERMEDIATE ♠ ADVANCED ♠ EXPERT

EXAMPLE:

This image displays a vast collection of technology-related icons, organized into a grid with 15 main categories. Each category is represented by a bold, uppercase header. The icons themselves are small, colorful logos for various frameworks, languages, tools, and services. For example, the 'FRONTEND' category includes icons for HTML5, CSS3, PWA, D3.js, Chart.js, PrimeNG, Next.js, xplat, WebPack, Angular, CodeSandbox, Ionic, Lodash, Bootstrap, jQuery, CRA, AG Grid, and AngularFire. The 'BACKEND' category features Microservices, Node.js, GraphQL, Express, KeystoneJS, and NGINX. The 'TESTING' category lists TestCafe, Jest, Karma, and Jasmine. The 'TOOLS' category includes WebStorm, Android Studio, IntelliJ IDEA, Visual Studio, Visual Studio Code, Vim, and VirtualBox. The 'LANGUAGES' category shows TypeScript, Kotlin, Markdown, and Bash. The 'DATABASES' category includes MongoDB, Mongoose, NoSQL, PostgreSQL, MySQL, ORACLE, and IndexedDB. The 'VERSION CONTROL' category has Git, GitHub, and GitLab. The 'GRAPHICS' category lists SVG, Figma, Blender, Adobe Illustrator, Adobe Photoshop, Adobe Creative Cloud, Affinity Designer, GIMP, and Inkscape. The 'OS' category includes Linux, Ubuntu Linux, SUSE Linux, Red-Hat Linux, CentOS Linux, Debian Linux, Fedora Linux, macOS, and Windows. The 'MOBILE' category has Android. The 'CLOUD' category includes Firebase, Cloud Firestore, and GCP - Google Cloud Platform. The 'JAVASCRIPT' category lists Promises and RxJS. The 'BUILD SYSTEMS AND PACKAGE MANAGERS' category includes Gradle, Yarn, and npm. The 'OTHER' category is the largest and includes Google Play, WordPress, ReactX, RegExp, Google Maps, Customer Support, Agile, Scrum, ALM - Application Lifecycle Management, Algorithms, Data Structures, OOP - Object Oriented Programming, SOLID Principles, FP - Functional Programming, Design Patterns, Software Architecture, Refactoring, Code Review, TDD - Test-Driven Development, BDD - Behavior-Driven Development, DSL - Domain-Specific Languages, Antipatterns, Making Presentations, Leadership, Performance Optimization, Performance Profiling, UX - User Experience, Troubleshooting, Graphic Design, and Testing.

Genengine SL (as Consultant)

2019 - 2020

Málaga, on-site and remote

[Please also take a look at 2 recommendations on LinkedIn](#)

[PROJECT: GENENGINE ANGULAR APP FOR GENETIC DIAGNOSIS OF RARE DISEASES](#)

First I wrote a suite of E2E UI tests in TestCafe from scratch, in order to increase confidence while making changes. Then I made numerous improvements of UI/UX, performance, robustness, architecture, refactors and I prepared the app for release. Working directly with CEO & CTO. Communication in English and Spanish.

[PROJECT: PLATFORM FOR ASSESSING RISK](#)

PWA working fully offline and synchronising with server to support multi-million-dollar multi-national functionality. Advanced analytics using charts and grid. Internationalisation. I developed the Angular + Bootstrap app from scratch and helped with the Node.js + MongoDB backend (conceptually as well as in development). Communication in English and German.

PROJECT: FLEXAGENDA

Android app for time planning (freemium). Reached 100k installs organically. 4.3/5 average rating. I developed the app from scratch in native Android & Java and released many versions based on a lot of user feedback I received. I was also in regular communication with users (paid and gratis) over e-mail, IM and voice chat, helping to solve issues and discussing improvement suggestions. App available in English, Spanish, German, Polish.

PROJECT: LIFESUITE

ionic 5 App (Web, Android, iOS) for finding solutions (psychology, motivation, productivity, etc.) to common life problems and to see life overview in terms of charts (SVG) like Ikigai, Flow State, etc. Released to Google Play and soon to Apple App Store. Has a search engine with Damerau-Levenshtein distance between strings - fuzzy search taking typos into account, with memoization for performance optimization. Strictest settings of TypeScript and Angular.

PROJECT: MEZZANINE ANDROID

Lead developer on the Android client of Company's flagship product, Mezzanine. I solidified and refactored existing codebase/prototype written by a Junior Developer, successfully releasing it and then making subsequent releases with new features. Also developed a schema language and code generator for Company's communication protocol, using JetBrains MPS (generating Java code from a DSL).

PROJECT: TEAMFORGE INTEGRATION WITH GERRIT AND GIT

Worked at the Company that created Subversion (Svn) version control system, somewhat ironically on development of integration of Git and Gerrit with CollabNet's flagship product - TeamForge, an ALM (Application Lifecycle Management) enterprise system, used by big enterprise clients like Intel, Ericsson, NXP. We were also dogfooding using the Gerrit-based code review system which was a great opportunity to also master advanced Git workflows using rebasing, squashing, etc.
